PRAVEEN KUMAR R

+91 9894891974 | praveen10a2005@gmail.com | Linkdin | Portfolio

CAREER OBJECTIVE

Motivated Electronics and Communication Engineering student with a strong interest in IoT design, Embedded systems and software development systems. Seeking opportunities to apply technical skills through internships or entry-level roles while continuously learning and contributing to innovative engineering solutions.

EDUCATION

Bachelor of Engineering | Electronics and Communication Engineering – Pursuing CGPA 7.51/10
University College of Engineering (BIT-Campus) Trichy -24 2023-2027
HSC | KAP Viswanatham Higher Secondary School, Tiruchirappalli, Tamil Nadu, India 81% March 2023
SSLC | KAP Viswanatham Higher Secondary School, Tiruchirappalli, Tamil Nadu, India March 2021

SKILLS

- Languages: C, Embedded C, Python, MATLAB, Verilog HDL
- Tools & SW: Wokwi,Hive MQTT,Node Red, Firebase,Blynk,Thinkspeak,ProteusVSM, Xilinx Vivado, Keil, CANoe
- Web Dev: HTML, CSS, JavaScript, React, Django, SQLite, API calling, VS Code, GitHub, Vercel.
- Core Domain: Circuit Desing and simulation

EXPERIENCES

Robotics and Automation – Ingage Techentive Academy, Chennai | Oct 26 -30
Gained practical knowledge of sensors,ICs, and ESP32-based embedded systems.Developed hands-on robotics projects, including a Line Follower Robot and Light Follower Robot & implemented a Bluetooth-Controlled Remote Control Car

On-The-Job Training – VDart Academy Trichy | Jun 26 – Jul 26
Worked in a full-stack development AI-powered content generation platform using React, Django REST Framework, and SQLite, enabling Users to generate, edit, and manage AI-generated text and images through an intuitive dashboard.

Design and Analysis of Digital VLSI - National Institute of Technology, Trichy | Dec 25 - Jan 26
Designed and simulated digital circuits using Verilog HDL and Xilinx Vivado. Implemented and analyzed the performance of Digital Alarm clock as project

Analog and Digital Circuit Design and Simulation National Institute of Technology, Trichy | Jan25 – Feb25
Designed and simulated analog and digital circuits using Proteus VSM. Analyzed circuit performance and validated simulation results.

PROJECTS

Cloud Integrated Firebase IoT Dashboard (IoT):
Developed an IoT-based smart environment monitoring and automation system with real-time sensor visualization, MQTT communication, cloud data storage, and automated actuator control as part of the Naan Mudhalvan IoT Application Course

Digital Alarm Clock – Mini Project (VLSI):
Designed and implemented a digital alarm clock in Xilinx Vivado Verified functionality through simulation and timing analysis

Smart Door Lock system – Mini project (Embedded system)
Designed and simulated a smart door lock system in TINDERCAD, Using basic microcontrollers and understanding the working concepts.

Tech Dining System (Design Thinking)
Developed a "Tech Dining System" using Design Thinking methodology to create Sustainable and customer-centric dining solution.

Web application / Full stack development

- Developed a Modern Portfolio for ECE students ,Content IQ – during VDart Internship,Ai voice Translator web application : Link

CERTIFICATIONS

- Completing the "Introduction to Machine Learning" NPTEL course with a score of 68% Elite.
- Completed a Web Development Course under the PMKVY Scheme.
- Finished professional development courses in Design Thinking and ADAS Simulation I & II via Naan Mudhalvan
- Completed Build and Deploy AI apps with Google AI Studio: Multilingual AI speech App Development from GUVI X HCL
- Completed professional development courses IoT Application ESP-32 via Naan Mudhalvan

LANGUAGES

- Tamil (Native)
- English (Fluent)
